

# SUCCESSFUL PEER FACILITATORS

## NEVER STOP LEARNING

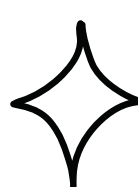

By Sarah Mustafa

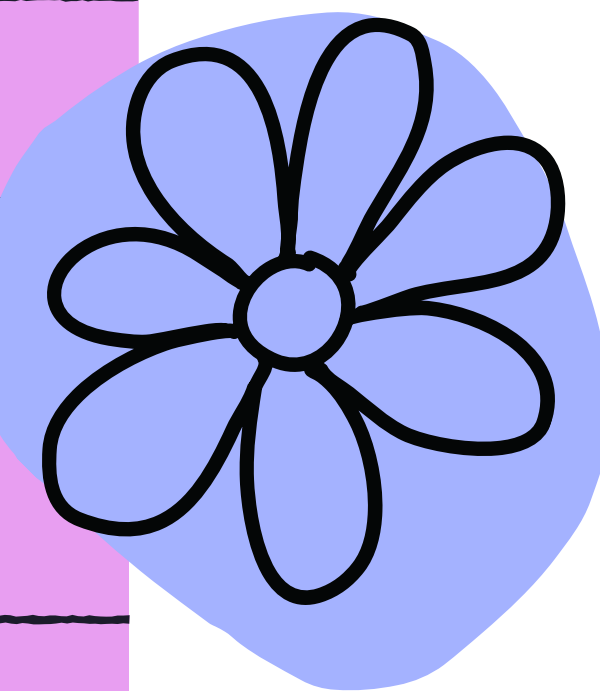

### Successful Peer Facilitating 101:

- Eye contact with students is actually great!
- Be aware of cultural and disability difference.
- Let the students know that being wrong is part of learning.
- Silence/wait time encourages thinking.
- Students don't always mean it when they say they understand.

### Not so Successful Peer Facilitating 101:

- Waiting for students to reach out for help.
- Repeating the same explanation multiple times.
- Doubting yourself and your knowledge.
- Assuming you have to have a correct answer for every question.
- Standing in one spot when you aren't helping a student.

### Reflection:

As my peer facilitator journey comes to an end, I reflect back on what I have learned. And the main thing I found is that learning never actually ends. As students and educators, there's always always room for improvement, inside and outside of classrooms.

### Feedback from Students:

- "Thank you for taking the time to explain that."
- "I feel more comfortable asking you for help than the professor."
- "Yeah that makes much more sense now. Thank you."
